Fund performance figures are calculated in the currency of denomination and the sterling equivalent. The fund performance data shown in the tables above include the annual management charges which have been levied in the past. The figures have been calculated on offer prices on the first day of each month. Details of the individual fund performances are available on request. Performance figures are for discrete years. Past performance is not a guide to future performance. The value of any investment and the income from it can fall as a result of market and currency fluctuations and you could get back less than the amount originally invested. You should not use past performance as a suggestion of future performance. It should not be the main or sole reason for making an investment decision. Performance information which is more than three months old is likely to be out of date. For more up-to-date information, please contact your relevant financial professional.

The International Gilt and Income fund can invest up to 100% of the value of the fund in government and public securities issued or guaranteed by HM Government, the International Bank of Reconstruction and Development or the European Investment Bank as permitted by the Financial Services Authority (Authorised Collective Investment Schemes) Regulations 2010.
