ADJUSTING

At a Glance

# At a Glance

Charles Taylor Adjusting is one of the leading international loss adjusting businesses in the market. We focus on commercial losses and claims in the aviation, marine, natural resources, property, casualty, technical and special risks markets, many of which are large and complex in nature.

---

## About us

Our services include onshore and offshore energy claims, maritime casualties, aircraft losses, large infrastructure claims and financial lines losses.

We believe we are the only global loss adjuster to have achieved a true market leadership position across all these disciplines.

With our global spread of offices and multi-lingual staff, we are committed to providing services to our clients' exact requirements.

Whatever the task, we bring our highly qualified and technically trained staff to bear on our clients' adjusting and risk consultancy needs, helping parties to achieve a superior resolution of their claims.

---

## Our services

### Aviation

Aviation claims can range from substantial aircraft damage requiring coordination of complex repairs to investigation of major accidents involving complete loss of large passenger or cargo aircraft. Our services include hull surveys, liability services, crisis and risk management, operational safety surveys, salvage sales and aviation asset management.

### Natural Resources

Our natural resources team focuses on handling large and complex losses arising from onshore and offshore exploration, development and production, renewable energy, petrochemicals, refining, mining and associated industries. Incidents during construction and operation, and associated business interruption, can result in major claims to the energy insurance market. We handle some of the most high profile claims presented to insurance markets worldwide.

## Property, Casualty, Technical & Special Risks

We offer extensive experience in handling routine, major loss and complex claims for a complete range of property, casualty, construction and engineering, professional and financial lines, recall/ crisis management, specie and fine art, political risks and trade credit risks and cyber risks. Services extend to survey, adjusting and forensic accounting.

## Marine

Our marine team offers expertise in the handling and adjustment of hull and machinery, cargo, yacht, ports and terminals, and liability claims. This expertise arises from a combination of legal and industry qualifications, decades of experience, and an employee training programme which is widely recognised as one of the best in the industry.
